OLD OUTHOUSE Balsa Wood Kit

# OLD OUTHOUSE

## Balsa Kit Project

### Suggested Instructions

1. Cut a door from the front wall leaving a door frame for strength. Make paper hinges to swing the door. Using some Seat off-cut make a door handle.
2. Cut the top of the Side Walls at an angle or leave straight and use a Seat off-cut to make the roof slope backwards.
3. Cut a side window for ventilation - make a window box for flowers from the window off-cut
4. Cut out the Seat and glue to the Back and Side Walls. Make a lid for the seat and use paper hinges.
5. Glue the roof and walls together and then glue this to the base.

### Finish the model off by

- Making a paper spider and hang from a piece of cotton.
- Adding a path, trees or shrubs made from material from outside your classroom.
- Rolling up a short length of black paper to make a snake!
- Rolling up a small bit of white paper to make a toilet roll. Hang it on the wall using a paper clip toilet roll holder.
- Write a poem and place inside for some reading matter.
