WELDING FUMES

NOW CLASSIFIED AS CARCINOGENIC TO HUMANS

Recently, welding fumes have been reclassified by the International Agency for Research on Cancer (IARC) from Group 2B to Group 1: carcinogenic to humans. This was primarily associated with the effects of UV exposure on the skin and eyes for lung cancer, and some evidence for kidney cancer from welding fume exposure.

Long term exposure to welding fumes can cause lung damage and various types of cancer, including lung, larynx and urinary tract. Chromium can be created during welding of many stainless steels and non-ferrous alloys, and is highly toxic and can cause cancer. Certain fumes, including zinc, may induce metal fume fever, stomach ulcers, kidney damage and nervous system damage. Prolonged exposure to manganese fumes can cause Parkinson's-like symptoms.

Powered Airflow Welding Helmet

Part No. W102816

- CLEARWelding FreeFlow V3 PAPR 5-13 Auto Lens Flip Front Welding Helmet
- Flip-up Grinding Visor
- Largest Viewing area on the market (75 x 107mm)
- Digital Welding lens Interface (Shade range 5 – 13)
- 3 year Warranty
